CLASSROOM-BASED INSTRUCTION. PLUS LAB.

This is NOT your ordinary Review course. We do not just hand you a book or CD and send you on your way. We want to assist you in succeeding, so we have a personalized lecture-lab curriculum setup. Basically, you get the best of both worlds. With the lecture component you benefit from six (6) nursing instructors who are nursing specialists in major hospitals who will provide you with didactic content review in their specialty. What better way to review the OB/GYN section than with an OB/GYN Nurse specialist? With the lab component you benefit from the latest software that provides you access to 3,500 NCLEX® - RN questions and 2,500 NCLEX® - PN questions, which includes the new "alternate-format" questions recently introduced into the NCLEX®. In addition, our course adapts to you, since we test you weekly to identify your strengths/weaknesses to help us develop your customized review plan.
